

## We support your power to choose

As part of our mutual commitment to support your energy choice, Silicon Valley Clean Energy (SVCE) and Pacific Gas and Electric Company (PG&E) have partnered to provide you with a comparison of typical commercial electric rates, average monthly charges and generation portfolio contents.

## 2018 Commercial Electric Rate Comparison, E-19S\*

	PG&E	PG&E Solar Choice	SVCE	
			GreenStart	GreenPrime
Generation Rate (\$/kWh)	\$0.10406	\$0.08803	\$0.07616	\$0.08416
PG&E Delivery Rate (\$/kWh)	\$0.07516	\$0.07516	\$0.07516	\$0.07516
PG&E PCIA/FF (\$/kWh)	N/A	\$0.02104	\$0.02165	\$0.02165
Total Electricity Cost (\$/kWh)	\$0.17922	\$0.18423	\$0.17297	\$0.18097
Average Monthly Bill (\$)	\$47,291.73	\$48,614.61	\$45,643.27	\$47,754.31

\*This compares electricity costs for an average commercial customer in the SVCE/PG&E service area with an average monthly demand of 618 kW and an average monthly usage of 263,880 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-19S rate schedules for PG&E's and SVCE's published rates as of April 1, 2018.

**Generation Rate** is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both SVCE and PG&E customers.

**PG&E PCIA/FF** represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The cost for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers. The PCIA is currently being reviewed by the CPUC and the methodology is subject to change. A final decision is expected later in 2018.

\*As reported to the California Energy Commission's Power Source Disclosure Program. PG&E data is subject to an independent audit and verification that will not be completed until October 1, 2018. The figures above may not sum up to 100 percent due to rounding.

\*\*Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
