

# Calculate Your Savings with Silicon Valley Clean Energy

Silicon Valley Clean Energy (SVCE) is a community-owned electricity provider offering carbon-free energy at lower rates for 13 Santa Clara County communities.

This worksheet will help you compare what you would be paying per month for PG&E electricity generation services to what you are paying for SVCE generation services.

Your Silicon Valley Clean Energy electric charges will appear on your PG&E bill and you will receive a credit from PG&E on the bill since you are no longer purchasing its power. Below we explain how to calculate your savings.\*

\*Worksheet does not apply to NEM customers.

## As a GreenStart customer here's how you calculate your savings:

**Step 1** Enter "Generation Credit" usually found on page 3 of your bill. You do not need to include the negative symbol. This is the generation fee now provided by SVCE's generation service, so PG&E credits this charge back to your account to avoid any duplication of generation fees.

\$ \_\_\_\_\_  
CREDIT FROM PG&E

**Step 2** Enter additional charges from PG&E: Power Charge Indifference Adjustment and Franchise Fee Surcharge on page 3. This covers energy purchased by PG&E on your behalf before you joined SVCE.

\$ \_\_\_\_\_  
PCIA  
+  
\$ \_\_\_\_\_  
FRANCHISE FEE

**Step 3** Enter charges for Silicon Valley Clean Energy's power, called "Net Charges" on page 4. Other fees found here, which may include an Energy Commission Surcharge and sometimes a local Utility Users Tax, are paid by all PG&E customers and are not new since becoming an SVCE customer.

+  
\$ \_\_\_\_\_  
NET CHARGES

**Step 4** Add the amount of the 3 lines from Step 2 and Step 3.

\$ \_\_\_\_\_  
TOTAL CHARGES

**Step 5** Subtract the amount in Step 4 from the PG&E credit in Step 1 to see your savings.

\$ \_\_\_\_\_  
TOTAL SAVINGS
