

SILICON VALLEY  
CLEAN ENERGY

---

**INVITES APPLICATIONS FOR  
PRINCIPAL POLICY  
ANALYST**

## You Have the Power!

Please consider this opportunity to serve as  
Principal Policy Analyst for *Silicon Valley Clean Energy*

- Serve a mission-driven organization dedicated to lowering carbon emissions
- Join a dynamic team delivering clean energy to Silicon Valley

### About Silicon Valley Clean Energy

*Silicon Valley Clean Energy* (SVCE) is a public sector community-based start-up currently serving approximately 275,000 residential and business electricity customers in Silicon Valley with annual revenues of nearly \$300 million. As a leader in the emerging industry of clean energy, SVCE embodies Silicon Valley's culture of entrepreneurialism and environmental responsibility and is poised for continued growth and innovation. SVCE is laser-focused on its mission to bend the carbon curve downward by providing renewable and carbon-free electricity to consumers at competitive rates and to offer innovative customer programs to lower carbon emissions from the transportation and built environment sectors.

Founded in 2016, SVCE is governed by a supportive board of directors representing the 13 communities it serves and is managed by a board-appointed CEO. The CEO and executive team are smart, collaborative, and results-oriented, jointly committed to improving their organization, community, industry and the world.

For further Information on SVCE, go to  
[www.SVCleanEnergy.org](http://www.SVCleanEnergy.org).

### Work Culture

SVCE exemplifies Silicon Valley's entrepreneurial and innovative spirit by pursuing cutting edge programs and services. It operates like a start up with high energy and high expectations where creative problem solvers and strong communicators work together to meet customer needs and pursue an environmentally sustainable future.

The organizational culture supports open communication, responsibility, creativity, accountability, teamwork and care while welcoming the diversity of experience and perspectives brought by each employee.

### The Position

The Principal Policy Analyst is central to the successful operations of SVCE. The Analyst is part of the Policy team which focuses local and state policies that impact SVCE, including but not limited to, resource planning, rate making and rate design, direct access policies, exit fees imposed on SVCE customers, and distributed energy resources policies and programs. The Principal Analyst will need to integrate input from all other SVCE divisions in addition to external stakeholders, such as the California Community Choice Association (CalCCA).

The Principal Analyst will work independently and in teams, as needed, to perform assignments under the general direction of the Director of Legislative and Regulatory Policy.

Examples of anticipated assignments include drafting comments in response to CPUC or CAISO filings; meeting with CPUC and CAISO decision-makers and staff; working with CalCCA and other CCAs in developing advocacy strategies that impact CCAs; working with internal teams, such as Power Resources, to ensure SVCE is meeting its compliance obligations; attending workshops, hearings and other public forums which discuss policy issues that impact SVCE; supporting the development of written reports and oral presentations for community training and workshops, legislative and professional groups, the Board of Directors, and SVCE staff; managing consultants and contractors.

### The Ideal Candidate Will

- Possess excellent quantitative and qualitative analytical skills
- Understand regulatory processes at public utilities commissions/public service commissions.
- Understand energy markets
- Possess superb communication skills in writing, one-on-one conversation, small group discussion, and public presentation
- Embrace a growth mindset which learns from success and failure alike
- Thrive working within a small, heavily outsourced team and a lean organization

### Key Attributes

#### Mission Driven

Passionate and inspired by SVCE’s vision of combating climate change.

#### Collaborator

Engages stakeholders in internal operations and resists a siloed organization.

#### High energy

Performs at full bandwidth and with high expectations; excels in a hands-on entrepreneurial environment.

### Qualifications and Experience

#### Qualifications

A Bachelor’s degree in business or public administration, operations management, economics or closely related field, or other degrees with demonstrable and commensurate work experience that is directly relevant for this position. A Master’s Degree in the aforementioned fields can substitute for up to one year of the required experience, a Doctoral Degree up to three years.

#### Experience

Eight (8) years of progressively responsible experience as an analyst at an electric utility, regulatory agency, cleantech company, or similar organization with emphasis on electrification of the built environment, mobility, or

grid integration, or a closely related field. Excellent communication skills are also required.

#### Compensation

The salary range for the position is \$120,952 - \$190,067 annually, depending on qualifications and depth of experience.

SVCE offers an attractive benefits package including individual, family and domestic partners health insurance; monthly fitness benefit; defined-contribution retirement and employer matching contributions; health reimbursement account stipend; a flexible spending account stipend; and paid vacation.

SVCE currently plans to have all employees work remotely through September 2021 and is evaluating the option of implementing a hybrid remote-working model thereafter.

#### To Be Considered

Please find the required SVCE Application Form and additional information along with submittal instructions at: <https://www.svcleanenergy.org/jobs/>

This posting is open until filled. A first review of applicants will commence on Friday, June 18, 2021.
