Silicon Valley Clean Energy Overview

Silicon Valley Clean Energy (SVCE), a Community Choice Energy agency, is redefining the local electricity market and providing our residents and businesses with new clean energy choices—renewable and carbon-free electricity at competitive rates. SVCE was formed as a Joint Powers Authority in 2016, and now serves approximately 270,000 residential and commercial electricity customers across a service area comprised of the following thirteen communities: Campbell, Cupertino, Gilroy, Los Altos, Los Altos Hills, Los Gatos, Milpitas, Monte Sereno, Morgan Hill, Mountain View, Saratoga, Sunnyvale and Unincorporated Santa Clara County. 97% of electricity customers in SVCE’s service area receive their electricity from SVCE. For general information on SVCE, please visit: https://www.svcleanenergy.org/.

Need for Summer 2023 DERMS

SVCE is pursuing multiple options to help the grid reduce load and increase supply during moments of peak stresses (such as the heat wave that occurred in September 2022). While long-term efforts are underway, SVCE is seeking another short-term solution in the form of this DERMS to help in 2023 if there are adverse grid conditions. Further, as SVCE considers long-term approaches, it seeks experience with enrolling distributed energy resources (DERs) onto a DERMS, calling on resources via the DERMS during events, everyday optimization of loadshapes, and evaluating the impact of said resources.

SVCE has strong connections with its thirteen member agencies – these agencies have various existing facilities that may be able to connect to a DERMS and dispatch in response to events. SVCE also supported some of these cities in deploying resilience-focused storage systems at key facilities. These municipal partners are the primary target for enrolling in the DERMS, though SVCE is interested in other potential targets of opportunity. The focus is largely on existing DERs.

The overall goal for the DERMS in 2023 is two-fold: (1) aggregate targeted DERs in SVCE territory to help respond to critical grid events in 2023, and (2) test the process of implementing a DERMS to generate learnings for SVCE and create a roadmap for full-scale deployment to understand how it may fit into future SVCE plans.

Proposal Submittal

Proposals must be received on or before June 9, 2023 at 5:00 PM PST and submitted by email to solicitations@svcleanenergy.org.
Only electronic submittals in PDF format will be accepted.

Proposals must include the following sections (to be submitted in this order only):

1. Administrative Information and Experience (2 pg. max)
   - Provide administrative information, and include at a minimum: name, mailing address, phone number, and email of designated point of contact.
   - Highlight expertise of key staff on project. Include information on three similar or relevant projects including description, cost, timeline and reference contact information.

2. Proposed work plan (4 pg. max)
   - Present a well-conceived work plan to address all aspects of the scope described below. Include a full description of how you would approach each task. Which elements are prioritized? Do not merely repeat the scope as written by SVCE – demonstrate your understanding of the underlying goals and help SVCE understand how you would add value. Show how the work plan would meet SVCE’s objectives and schedule.
   - Suggest any innovations, additions or modifications to the scope that SVCE prepared - include in this section any key elements that the Bidder feels would add additional value to scope initially developed by SVCE.

5. Schedule (1 pg. max)
   - Illustrate how the work plan would proceed and what the key milestones or benchmarks would be, along with required levels of SVCE staff and stakeholder engagement.

6. Cost proposal (1 pg. max)
   - Include direct labor rates and estimated hours for named project resources, with sub-consultant rates, if applicable. Estimate other direct costs and reimbursable expenses, if any, and associated mark-up percentages, if any. Include a breakdown of costs by task for all tasks within the scope and any innovative components added to the work plan by the Bidder. Explain how enrolled technology type(s), # connected DERs, and enrolled capacity (in kW) impact the cost if at all.

Questions

Bidders may submit questions concerning the RFP to solicitations@svcleanenergy.org. All questions and answers will be shared with all Bidders and will be posted in the same location as the RFP, at https://www.svcleanenergy.org/solicitations/. Questions must be received by June 5, 2023 at 5:00 PM PST and responses will be posted the following day. SVCE shall not be responsible for nor be bound by any oral instructions, interpretations or explanations issued by SVCE or its representatives.
Standard Contract Terms

SVCE’s standard contract terms have been appended to the end of this document. Due to the quick turnaround time, please review the terms and note any exceptions in your response. This will allow SVCE to be aware of any potential issues and move quickly in contracting once a selection is made.

Timeline

SVCE aims to finalize selection and contracting for this work by late June 2023 and kick off the scope of work described below in July. The work will be focused on the summer of 2023 and some components (including evaluation and learnings) may continue into early 2024.

Evaluation

SVCE will evaluate proposals based:

- The Bidder’s knowledge of DERMS, interfacing with various DERs, baselining, and likely needs from the power supply team’s perspective as represented by expertise of key staff identified in the proposal
- The Bidder’s knowledge of key internal and external players integral to the successful deployment and utilization of a DERMS, as indicated by the proposed approach and referenced work experience
- Experience working with local government facilities
- Creativity in approach described in the proposal, willingness and ability to enroll DERs opportunistically throughout the contract, and ability to meet the timeline

Project Scope (Not to Exceed $90,000)

Task 1 – Establish DERMS at SVCE: The objective of Task 1 is to work with SVCE staff across teams to instantiate the DERMS, determine the operational flow, integrate with existing SVCE systems, and train SVCE staff. Bidder may propose the level of their own involvement in ongoing operation of the DERMS based on their specific solution and business model.

Possible components (others to be suggested in proposal):

- Steps for implementation and training
- Integration needs and process (e.g. with SVCE billing system, data warehouse)
- Process for calling events and relying on dispatches for procurement decision-making

Task 2 – Enroll Member Agency Facilities in DERMS: The objective of Task 2 is to enroll feasible SVCE member agency facilities in the DERMS.

SVCE will be able to lead the outreach and set up conversations with member agency staff. The consultant will be responsible for supporting the development of SVCE collateral such that marketing materials that clearly explain the process and value to these staff. Consultant should plan to take advantage of the Emergency Load Reduction Program funds, rate
optimization, and possibly additional SVCE incentives when explaining the value available (to be finalized with SVCE staff). SVCE may also suggest relevant marketing topics for this audience.

Consultant will need to make the enrollment process as easy as possible and ideally support a wide range of technologies and facilities. SVCE is hoping to largely enroll facilities that already have smart DERs or energy management systems (i.e. existing technologies), but is open to considering additional financial support if necessary to unlock the potential of some facilities. SVCE is aware of facilities with solar and storage systems that it particularly hopes to enroll.

Possible components (others to be suggested in proposal):

- Clear marketing and education materials
- Engagement in meetings with member agencies
- Handling technical process to connect DERs with DERMS, validating, troubleshooting, etc.

**Task 3 – Support SVCE in Using DERMS to Dispatch Connected DERS:**
The objective of Task 3 is to operationalize the DERMS and use it to affect load at the enrolled facilities (everyday optimization and event response). Bidder should explain the level of ongoing support that would be needed and available to SVCE staff when using the DERMS.

SVCE is also seeking support in tracking and understanding performance of connected DERs. Consultant will provide baseline methodology and impact reports associated with any dispatch of the DERs. Consultant should also help SVCE staff consider how to improve the integration with procurement decision-making based on DERMS dispatch process and results.

Possible components (others to be suggested in proposal):

- Active participation by consultant in calling SVCE events, or support for SVCE staff in doing so; automated, ongoing everyday/steady-state optimization
- Documentation showing results and certainty of impact; input on how and how much these projects could be used by SVCE to reduce Resource Adequacy and energy procurement obligations/costs or meet compliance needs; final report – articulating learnings and roadmap for scaling up DERMS approach and estimated impacts
- **SVCE hopes to be able to dispatch DERs starting in July and grow the enrolled capacity throughout the summer**

**Task 4 – All Other Activities:** The objective of Task 4 is to handle any other actions necessary for a successful DERMS implementation and to respond to opportunities as they arise.

Bidders should include in Task 4 any key elements missing from the earlier tasks and explain why these are necessary for the DERMS.

In addition, Bidders should estimate in the budget for Task 4 any possible scope additions. In this way, Task 4 is a contingency fund to cover suggestions and ideas that would meaningfully improve the DERMS performance or SVCE’s learnings. Some potential ideas of interest to SVCE staff include (others to be suggested in proposal):

- Allowing some other SVCE customers with non-residential facilities to enroll in the DERMS (SVCE would still handle outreach to connect with them)
• Connection of heat pump water heaters installed through SVCE’s past residential incentive programs to the DERMS
• Integration of SVCE’s current phone app for managed EV charging (including events) onto the DERMS platform
• Employee pilot to install/enroll DERs at employee homes into DERMS to test process and impact
• Winter/spring dispatch to test other goals (shifting out of potential winter peak, shifting into hours with renewables on grid)

D. Consultant’s indemnifications and obligations under this section shall survive the expiration or termination of this Agreement.

10. INSURANCE

A. General Requirements. On or before the commencement of the term of this Agreement, Consultant shall furnish Authority with certificates showing the type, amount, class of operations covered, effective dates and dates of expiration of insurance coverage in compliance with the requirements listed in Exhibit "D," which is attached hereto and incorporated herein by this reference. Such insurance and certificates, which do not limit Consultant’s indemnification obligations under this Agreement, shall also contain substantially the following statement: "Should any of the above insurance covered by this certificate be canceled or coverage reduced before the expiration date thereof, the insurer affording coverage shall provide thirty (30) days’ advance written notice to the Authority by certified mail, Attention: Chief Executive Officer."
