Subject: Comments on Net Surplus Compensation

Hi Andrea,

I may not be able to attend the Exec Committee Meeting today, though I will try to make it.

Please let Girish and the Exec Committee members know that I support reducing the amount of Net Surplus Compensation. I would prefer it if there were a 2-year phase in. I'd also prefer it if the compensation wasn't tied directly to PG&E's NSC level. Combining these two thoughts, I would suggest something like this:

Year 1: NSC = 7 cents/kWh

Year 2: NSC = 5 cents/kWh

Year 3: maintain the Year 2 level or decrease to 3 or 4 cents/kWh if circumstances require it.

I would also be in favor of significantly decreasing the maximum amount of payment from \$5000 to \$1000 for residential accounts and \$2000 for commercial accounts.

Cheers,
Bruce Karney
